Intellective offers dedicated IBM expertise to help partners deliver the leading ECM and BPM solutions

The Leading IBM Solutions

IBM and Intellective offer combined solutions for Enterprise Content Management, Business Process Management, data storage and security, workflow collaboration, and Customer Relationship Management. As a partner, you benefit from our expertise with IBM FileNet, IBM Case Manager, Business Automation Workflow, and Content Manager CM8.

Intellective Partners with IBM

Intellective has been an IBM partner since 2005, providing innovative business automation solutions to fortune 1000 companies across multiple industries. Our consultants are IBM certified in one or more technologies. We can help you grow your cloud presence with our IBM CloudPak strategy, and help you meet customers' needs with our expertise and proven delivery capability. In addition, we provide products like Unity for Salesforce and Unity for Dynamics that integrate with IBM content and workflow.

FOUNDED IN ECM	**DEEP EXPERTISE**	**COMPLEMENTARY PRODUCTS**	**BRIDGE GAPS**	**MIGRATE CONFIDENTLY**
We are global team of experts, founded in 2005 by innovators of the original FileNet case management stack.	All our technical staff hold IBM certifications, giving us the right expertise to understand customer problems.	We have our own complementary products that lower risk, cost, and time-frames to make deals attractive to customers.	We make IBM products more attractive, bringing features that bridge gaps and fill edge cases to help you drive decisions more effectively.	We bring tools and expertise to lower migration risk and cost, keeping customers on the IBM stack.

| **CLOUDPAK READY**	**ADVOCATES FOR IBM**	**HIGHLIGHT IBM STRENGTH**	**LOWER RISK**	**EXECUTE SUCCESSFUL PROJECTS**
We have strong expertise in CloudPak and current Digital Business Automation stack, deep ECM/BPM industry and competitive knowledge, and experience across many vertical industries.	We advocate for IBM with customers as a trusted technical partner.	We complement IBM capabilities with features that delight customers and highlight the value of their IBM investment.	We lower implementation risk with low-customization options for difficult problems.	We deliver successful projects with the right resources, methodology, and tools.

IBM Unity for Salesforce

Unity for Salesforce empowers your customers to seamlessly search for and manage documents, tasks, and data across multiple ECM and BPM systems, whether on-premises or cloud, right from within Salesforce. The solution integrates out of the box, allowing users to access and manipulate documents and data, manage cases, and process tasks directly from Salesforce.

Unity for Salesforce Provides:

- A seamless, rich, and contextual view of enterprise data from within Salesforce
- Advanced document management, case management, and task processing
- Enhanced Salesforce user engagement and productivity
- Extended reach to more customers and use cases with full repository search, CMOD and CM8 support, and case and process support
- Informed business decisions based on complete data from multiple enterprise systems and applications
- Improved business KPIs via process automation and insights

Unity for Salesforce unites your customer's Salesforce users with BAW and IBM Content Management, modernizing your customers' operations, and increasing your CloudPak IBM FileNet and Business Automation Workflow value proposition.

IBM Unity for Dynamics

Unity for Dynamics empowers users to seamlessly search for and manage documents, tasks, and data across multiple ECM and BPM systems, whether on-premises or cloud, right from within Dynamics. The solution integrates out of the box, allowing you to access and manipulate documents and data, manage cases, and process tasks directly from Dynamics.

Unity for Dynamics Provides:

- A seamless, rich, and contextual view of your enterprise data from within Dynamics
- Advanced document management, case management, and task processing
- Enhanced Dynamics user engagement and productivity
- Informed business decisions based on complete data from all your systems
- Improved business KPIs via process automation and insights
- A unified experience in Dynamics 365 with BAW and IBM content Management

Unity for Dynamics is seamless, simple to use, quick to deploy, reduces costs, and improves data security. Talk to us today about our IBM capabilities can help your business. Visit www.intellective.com.
